Mustering close to BHP railway

Mustering within close proximity to the BHP railway has specific risk, as a result the following requirements **must** be adhered to at all times.

1. All mustering vehicles shall maintain radio contact on a specified UHF channel to be supplied to BHP representative for distribution.
2. Mustering shall not occur within 100 meters of the BHP railway unless to cross the track at a pre-approved location which has been agreed upon by the BHP Rail Access team/TPO.
3. BHP prefer that cattle are mustered under bridge structures to cross the railway.
4. Pastoral operations **must** gain approval from BHP Train Control prior to crossing the BHP railway with cattle this includes pushing cattle under bridges - seek clarification from TPO about how to best liaise with BHP Train Control on the day of the muster to ensure minimal disruption and delay to mustering activities.
5. All mustering buggies and vehicles must cross the BHP railway at designated level crossings.
6. Helicopters shall increase altitude to greater than 200 feet when within 100 metres of the BHP railway.
7. Any heavy or slow-moving vehicles must request permission from Train Control to cross the BHP rail (i.e. cattle truck).
